Department: **Information Technology**

Supervisor: **Director of Technology Deployment**

Lane Placement: **ESP Lane 15-16**

Schedule: **8 hrs / 242 days** Evaluation Group: **JCES 15-16**

FLSA Classification: **Non - Exempt**

JOB DESCRIPTION

Under the supervision of the Director of Technology Deployment and the Director of Information Technology, the Application Engineer is responsible for providing experienced software design, development, debugging, documentation, maintenance, and quality assurance for enterprise applications and systems.

ESSENTIAL FUNCTIONS

- Designs, develops, debugs, maintains and tunes for performance the enterprise computer applications and databases as determined by project priorities set by the District administration. Applications include payroll, human resources and insurance; fixed asset auditing and tracking, general ledger accounting, online purchasing and warehouse inventory, accounts payable, student demographic, scheduling, fees, grading, attendance and testing data management systems.
- Designs, develops and maintains complex computer systems and reporting systems to support schools in data-driven decision making.
- Develops computer programs to ensure complete data integrity and the production and submission of reports to meet state/federal mandates and requirements.
- Develops, maintains technical documentation in support of computer applications, database configuration/management and other critical systems.
- Analyzes user needs and develops recommendations in determining training needs, process changes, programming development and/or maintenance projects and priorities, along with other technology related needs expressed by user requests.
- Builds programming project estimates using existing resources.
- Develops plans for and installs, configures, maintains and tunes enterprise-level administrative office application (i.e. e-mail; document imaging, transportation and student boundary management, substitute calling system, etc.).
- Applies advanced technical logic and problem solving skills in troubleshooting and resolving incidents across a broad range of computer applications and server systems.
- Designs, implements and tests application system security including hardening of systems, penetration testing and intrusion detection.
- Contribute to business continuation/disaster recovery, including backup scheduling, continuity and contingency planning and evaluation.
- Support System Administration team with installation, configuration, performance monitoring and systems tuning for UNIX, Windows and Macintosh enterprise server farms and desktops, Web servers, Large Scale SAN implementation and supportive infrastructures.
- Provides input into both short and long term technology planning efforts for the District.

- Assists the District Administration in fulfilling requests from the Board of Education by collecting data, preparing reports and distributing information.
- Predictable and reliable attendance.

NON-ESSENTIAL FUNCTIONS

- Other duties as assigned.

- | |
|---|
| <ul style="list-style-type: none"> • This description should not be construed to contain every function/responsibility that may be required to be performed by an employee assigned to this position. • To perform this job successfully, an individual must be able to perform each essential duty satisfactorily. • The requirements listed below are representative of the education, knowledge and experience requirements; the machines, tools and equipment used; background; and any licenses or certifications required. • Reasonable accommodations may be made to enable individuals with disabilities to perform the essential functions of this position. |
